USD INSTITUTIONAL FOUNDER CLASS POOLED (IE000MZ4R8L8)

Objectives and Investment Policy

Investment Objective

The investment objective of the Sub-Fund is to achieve long-term capital appreciation.

Investment Policy

The Sub-Fund seeks to achieve the investment objective by investing, directly or indirectly in equities, equity indices, commodities and UCITS compliant ETFs and CIS.

The Sub-Fund will invest in equities (including equity indices) on a long and short basis either directly or indirectly through the use of FDI. The Sub-Fund shall have a global focus, but will have a limit of 20% of the Sub-Fund's Net Asset Value on exposure to companies listed or traded on emerging market stock exchanges.

The Sub-Fund focuses on investment opportunities relating to companies involved in solving global climate concerns and seeks to invest across the full value chain of the energy transition. This is broken down into five sub-sectors: batteries, end markets, renewables, intermediates, and the materials crucial to the energy transition. This will include investment in listed companies focused on providing clean energy, those companies producing and processing the necessary related materials and grid infrastructure, and will also include energy storage and battery manufacturers.

The Sub-Fund will gain indirect exposure to commodities. To gain exposure to commodities, the Sub-Fund will invest in closed-ended CIS. The Sub-Fund may gain exposure, which may be long or short, to the major categories of traded commodities, including but not limited to metals, energy and minerals. The Sub Fund's exposure to commodities through investment in closed-ended CIS is limited to 10% of the Sub-Fund's Net Asset Value

The Sub-Fund may also gain exposure, either directly or through FDI, to open-ended, non-U.S. domiciled exchange traded funds ("ETFs") and open-ended collective investment schemes ("CIS") that are consistent with the investment policy of the Sub-Fund within the limit on investment in open-ended CIS i.e. no more than 10%, in aggregate, of the Net Asset Value of the Sub-Fund. The Sub-Fund may also invest in closed-ended CIS, which must be treated as transferable securities for the purposes of the UCITS Regulations.

The FDI which may be used by the Sub-Fund are swaps, futures and options. FDI may be used to obtain both long and short exposure to equities, ETFs, CIS and equity indices where the Investment Manager determines that the use of FDI is more efficient or cost effective than direct investment. The Sub-Fund may obtain short exposure only through the use of FDI. The Sub-Fund may also utilise forwards for currency hedging purposes.

It is expected that gross exposure of the Sub-Fund will not exceed 250%. Under normal market conditions, it is expected that long positions held by the Sub-Fund may represent up to 150% of the Net Asset Value of the Sub-Fund at any one time and short positions up to 150% of the Net Asset Value of the Sub-Fund at any one time.

The Sub-Fund may, pending re-investment or to support its FDI positions, in circumstances of extreme volatility or if market factors require and if considered appropriate to the investment objective of the Sub-Fund, invest up to 100% of the Sub-Fund's Net Asset Value in cash, cash equivalents (including, but not limited to, cash deposits, commercial paper and certificates of deposit) and money market instruments.

Benchmark

The Sub-Fund is actively managed which means the Investment Manager is actively making investment decisions for the Sub-Fund. The Sub-Fund is not managed in reference to a benchmark.

Why is the Sub-Fund in the specific category?

The risk category for this Sub-Fund is set at 7. It is calculated in line with EU regulations and is based on the risk limit for the Sub-Fund.

Risk Disclaimer

A **category 1** Sub-Fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a **category 7** Sub-Fund, the risk of losing your money is high but there is also a chance of making higher gains. The seven-category scale is complex. For example, a category 2 Sub-Fund is not twice as risky as a category 1 Sub-Fund. The risk category shown is not guaranteed and may change over time.

When categorising the Sub-Fund, it may happen that not all material risks were fully captured in the methodology:

Leverage Risk: Leverage arises from entering into derivatives whose terms have the effect of magnifying an outcome, meaning the profits and losses from investment can be greater than if the investment is made directly into the underlying securities.

For a more detailed explanation of risks, please refer to the "Special Considerations and Risk Factors" section of the prospectus.
